Wireframe:

A wireframe is a visual representation of the user interface of the application. Here is an example wireframe for the banking application:

_____

Welcome to Banking Application

1. Check Your Balance

2. Deposit

3. Withdraw

4. Transfer

5. Exit The System

Select an option:

User input

Display output

_____

The wireframe displays the main menu options for the user to select, a prompt for user input, and an area to display output, such as transaction results and messages. The wireframe provides a basic visual representation of the user interface of the banking application. The actual implementation of the user interface may vary depending on the platform or technology used for development.
